

Mask Policy.

Staying safe in our surgery.

Though the national restrictions on mask wearing have now been lifted, our staff and patients are still required to wear a mask at our surgery, unless they are exempt from doing so.

We are working tirelessly to follow infection prevention and control protocols at our practice, and mask-wearing remains an essential part of this—helping to limit the transmission and protect our most vulnerable patients.

We're also continuing to follow social distancing measures, so please keep an eye on the signs around our surgery and maintain a two metre distance from others.

If you're unable to wear a mask, please let the team know when you arrive, and the clinician will make an appropriate decision based on your circumstances to ensure you receive treatment in the safest possible way.

If you have any questions about this policy, please speak to a member of staff who will be happy to advise.
